

ALL LTC REHAB2 PARTNERS:

With the onset of the COVID-19 virus, we are amid trying and uncharted waters. We take the safety and health of your residents, staff and our staff very seriously. It is for these reasons we want to reach out and let you know that we still consider the services we provide to be extremely important and vital to the overall health of the residents in your facility that we are treating under the orders of a physician. It is our intent to continue to provide those services to maintain each resident's strength, well-being and stamina to assist in fighting off exposure to this or any virus.

Our staff will, as always, follow all universal precautions to prevent the spread of disease, but additionally we will adhere to any specific policies that your facility has put in place as part of your response to this threat. We will also be increasing our precautions and sanitation schedules back in our therapy treatment area to maintain the most secure and sterile environment possible. Please ask or consult with your therapy manager on any issues that you feel you would like us to address.

Please do not hesitate to reach out to us for any additional comments, questions or concerns that relate to this situation. As always, we consider ourselves as part of your team and therefore we want to be part of a proactive solution to this threat.
